Think Global. Think Green.

The Environment — We believe now more than ever, that it is our responsibility to protect the environment and our precious natural resources for future generations. The growing importance of energy and environmental concerns continues to challenge us in this ever changing marketplace.

As an industry leader, Global continues to take proactive steps towards reducing the negative impacts on the environment. We are building "healthier" offices; investing in Research & Development and new technologies; reducing waste and the consumption of energy; and improving the quality of the air we breathe, all which can have a significant impact on our quality of life.

Global's recycled fabrics offer affordable, environmentally responsible alternatives to commercial textiles. We recycle 35,000 lbs. of fabric off cuts.	Epoxy powder coating process is solvent free. No harmful VOC's or lead. No toxins are released into the atmosphere.
Global has the products and resources to help your projects achieve LEED certification.	New technology allows us to reduce glue usage by 50%. In addition, our water based glue reduces emissions and requires less energy to apply.

Intelli Beam™ with Foli Height Adjustable Tables

Intelli Beam brings forward a new era of open plan environments.

18 x 60 Starter Extension Kit
Starter fabric extension kits include a tackable fabric panel and appropriate hardware to "stack-on" to existing starter kits (IBBSU2460S). The extension kit adds to the height of the beam, providing a greater sense of privacy, space division and some sounds absorption.

18 x 60 Add-On Extension Kit
Add-on fabric extension kits include a tackable fabric panel and appropriate hardware to "stack-on" to existing add-on kits (IBBAT2460S). The extension kit adds to the height of the beam, providing a greater sense of privacy, space division and some sounds absorption.

Intelli Beam includes two knockouts for duplexes and one knockout for data.

The basefeed powers 4-circuits in a 2+2 electrical configuration (2 utility circuits and 2 dedicated circuits). This must be specified with an IBBSU2460S – this will then power the starter kit and any add-on kit connected to it. The base feed must be hardwired to the building power supply by a licensed electrician.

T-leg with adjustable glides

24 x 60 Add-On Beam Kit
Add-on kits includes all the pieces required to expand upon the starter kit. Add one additional add-on kit for a 4-pack, two add-on kits for a 6-pack or three for an 8-pack. Add-on kits must be used with one starter kit. Specify duplexes separately.

24 x 60 Starter Beam Kit
The starter kit includes everything you need to create a 2-person workstation (acts as a freestanding piece), or to start a run of more workstations. Just specify duplexes and a basefeed separately to get up and running.
