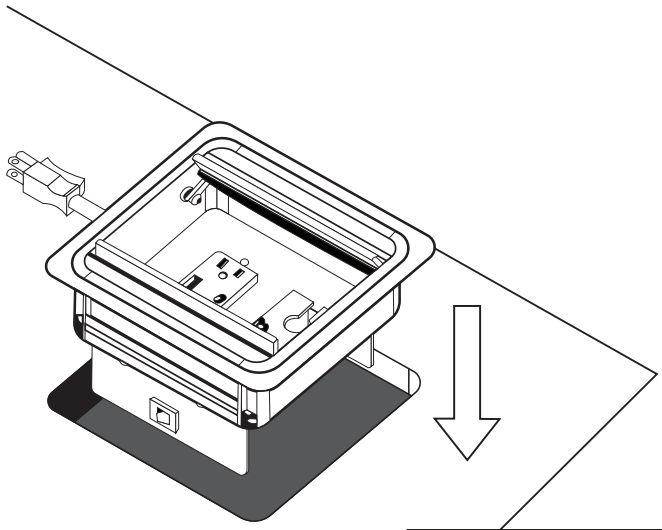
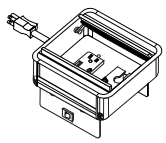
RECESSED TABLE POWER MODULE ASSEMBLY INSTRUCTIONS

MODEL: OTGPM

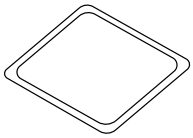
STEP 1 - Insert recessed module

- **Table cutout size 6.0” x 6.0”, radius @ 0.5”. Please reference supplied Recessed Table Power Module Template.**
- **Insert the Recessed Module with Bezel into the table cutout (Bezel is optional, and should be used when the cutout is slightly bigger than the standard cutout).**





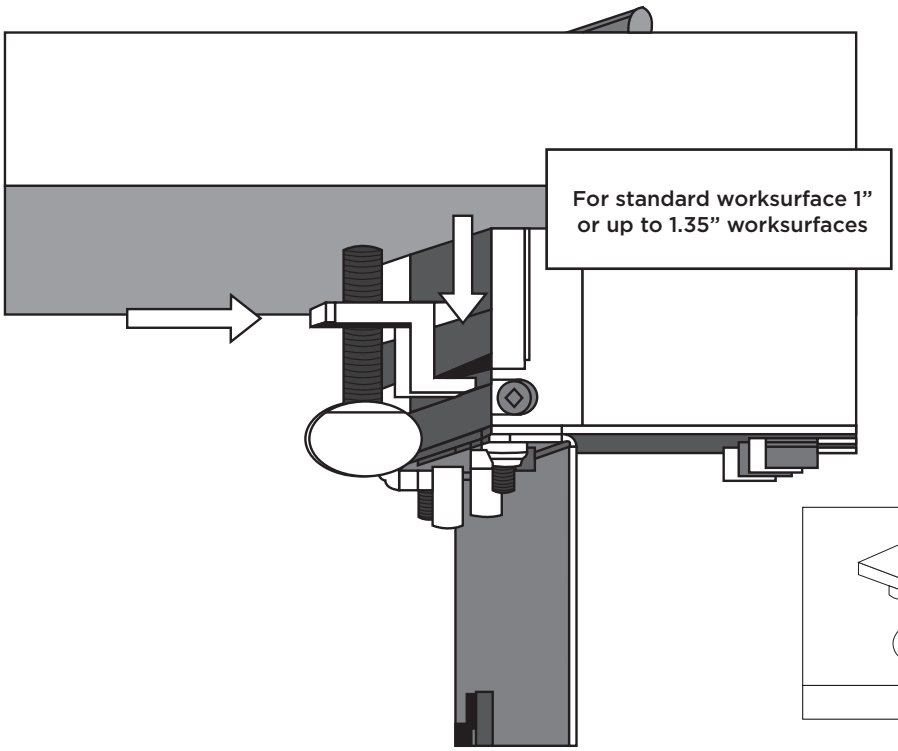
A x 1

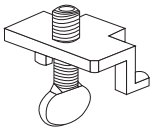


B x 1

STEP 2 - Attach and Tighten Mounting Brackets

- **Install item C on both sides of the box as shown and tighten the knob screw until the brackets hold the power module in position.**

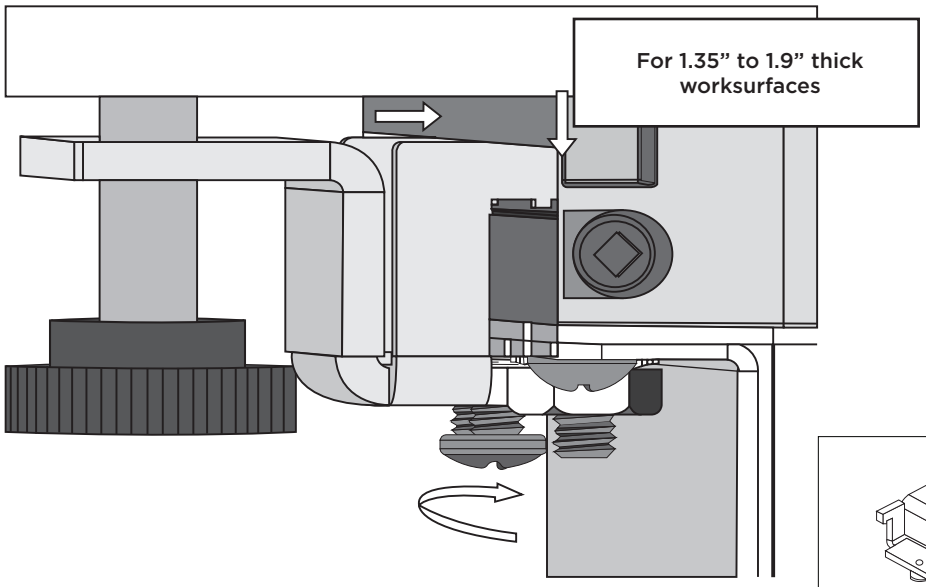


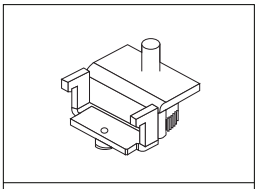


C x 2

STEP 3 - Install Mounting Kit

- **Install the item D to side of the box as shown and tighten the bottom screw.**
- **Tighten the thumb screws on item D until it hold the power module in position.**
- **Repeat the same step on the other side.**

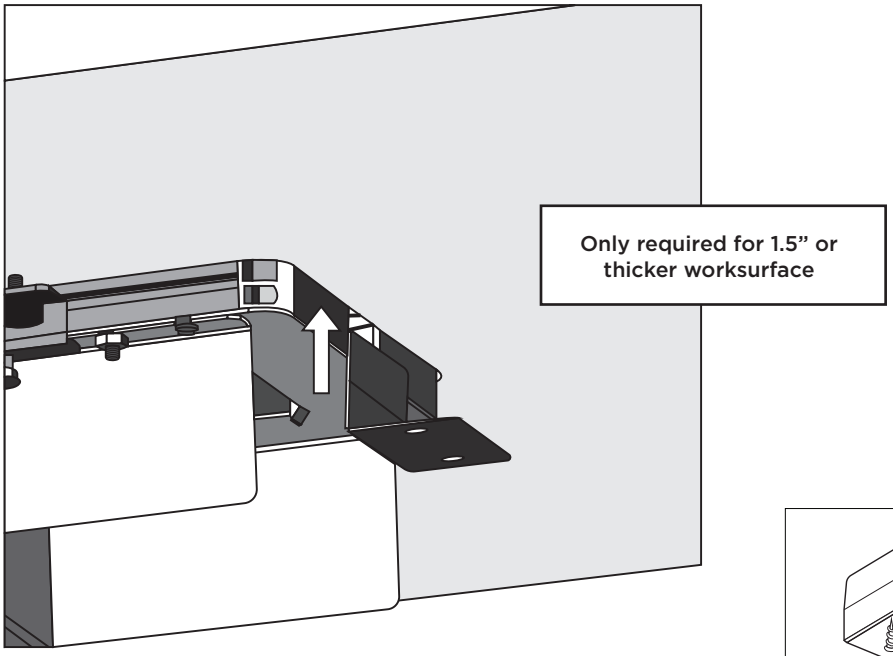


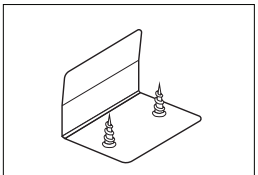


D x 2

STEP 4 - Secure Knockout Cover

- **Slide item E on both sides to cover the opening (Between side wall of the module and worksurface cutout edge).**
- **Use the wood screws to secure the plates.**





E x 2
